i ask that medically useful antibiotics be banned from all animal feed. this is an ever growing problem of bacteria becoming immune to antibiotics. one way of helping avoid this is to stop animal feed from having these antibiotics in them. this is very detrimental to society in my opinion. we as a nation are over using antibiotics unnecessarily from being overly prescribed by doctors as well as the foods we eat. i ask you to help in the removal/ban of all medically useful antibiotics from animal feed. this is one step in the right direction in addressing this problem. thank you for your help.
